Dr. Joshua Lederberg
Genetics Dept.
University of Wisconsin
Madison, Wis.

Dear Dr. Lederberg:

I am sending you today under separate cover copies of our reprints on the coliform bacteria. One paper in which I think you might be particularly interested is no longer available, but I wish to call your attention to it. The reference follows: Vaughn, Mitchell, and Levine 1939. The Voges-Proskauer and methyl red reactions in the coli-aerogenes group. J. Am. Water Works Assoc., 31, 993-1001.

There are other earlier reprints which also are unavailable so far as my own collection is concerned. If you have need for them you might write to Dr. Max Levine, Chief, Bureau of Laboratories, Territorial Board of Health, Honolulu. It may be that he has copies which he would be able to send to you.

We have started to get the collection of cultures ready to send. They should be on their way within the week.

Very truly yours,

A handwritten signature in cursive script, reading "Reese H. Vaughn". The signature is fluid and elegant, with the first name "Reese" and last name "Vaughn" clearly legible.

Reese H. Vaughn
